

RACING TECHNOLOGY FOR ROAD CARS

HELLA PAGID HIGH CARBON ROTORS

High Carbon:

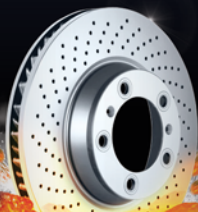

- Less prone to warpage
- Quieter operation

Coated:

- Easy installation
- No cleaning required
- Keeps rotors looking great for miles

Quality:

- X ray checked for air pockets, to assure rotors won't crack in use
- Same internal design as OE

HELLA PAGID BRAKE PADS

- Not a one size fits all program like many others
- Over 100 compounds to assure you receive the right friction for your car
- Pad design and shims are identical to OE
- OE level stopping capability
- Better brake laws compliant
- 90% European coverage
- ECR90 certification

WIN an iPad Mini!

Send an email to win@imcparts.net & include your account number, account name, and your name. Enter "Hella Pagid iPad" in the subject line. Good Luck! A winner will be selected at random in April of 2016. No purchase necessary.

WHY HELLA PAGID?

- Famed programs such as the factory Aston Martin and Corvette teams rely on Pagid Racing to supply braking
- OE experience gained from working with major global OE manufacturers for decades
- Continuous support of ASE and have on staff ASE brake specialists
- State of the art equipment and 180,000 miles of testing per year
