

# Lube, Oils, Additives, Car Care

Lubro Moly additives and motor oils, developed over the past 40 years by the German company Liqui Moly GmbH, will give you superior performance modeled after the company's extensive experience with racing cars and boats. Look no further for additives that will keep your car running at peak levels while preventing premature wear and deterioration.

Many Lubro Moly products include the exclusive Molybdenum Disulfide (MoS<sub>2</sub>) anti-friction lubricant. The MoS<sub>2</sub> anti-friction agent is an oil-insoluble additive that protects metal parts long after oil and grease have done their job.

**Key Features of Lubro Moly Oils Include:**

- Meets OE requirements
- PAO based oil
- Helps with cold starts
- Gives better fuel mileage
- Provides resistance to shearing and breakdown
- Maintains excellent oil pressure
- Permits superior wear protection
