- Thermal Shock Tested for heat and cold durability
- Durability Life Tested between 500 to 1,000 hours
- Packed with a bag of Silica sand to ensure stability of the electronics and connections with no oxidization

Applications Supported -

Available for European, Asian and Domestic applications

Manufacturer Information -

TPI's focus is to provide the customer what they need. With a focus on late-model applications, TPI can provide the alternative to "Dealer Only" responses. Rigorous testing procedures and quality checks are completed at all manufacturing facilities and processing warehouses, for unsurpassed quality assurance. Any and all original equipment design flaws are corrected by TPI engineers prior to production.
