

Brake Rotors

European, Asian and Domestic Vehicles Speak One Language:

With its unique know-how in the manufacturing of braking systems for high performance vehicles, Brembo is able to guarantee top quality standards and the most advanced technological knowledge, making it a world market leader in rotors. Brembo's skills ensures an unsurpassable performance level in the best cars produced in Europe, Asia and the United States today. Brembo Rotors are OE equipment on applications manufactured by Acura, Aston Martin, Audi, BMW, Chrysler, Dodge, Ferrari, Ford, General Motors, Honda, Infiniti, Jeep, Land Rover, Mercedes Benz, Nissan, Porsche and Volkswagen.

Brake Rotors

Tech Specs -

The Brembo Disc

•Exacting Precision

To guarantee maximum safety over time, Brembo uses highly advanced calculation and simulation systems in designing its brake discs, ensuring performances.

•Integrated Product Process

By integrating the foundries into its production process, Brembo has enveloped its own technical and design know-how - offering increasingly better products and advanced solutions.

•Strict Tolerances

Precise tolerance offer maximum performance, increased comfort, and extended longevity of the brake system components and axle.

•Precise Finish

The braking surface is machined to exact O.E. specifications to ensure synergy between the friction material and disc, from the running-in-stage.

•Electronic Balancing

An electronic balancing system is used during the production process to eliminate an unbalanced weight distribution of the ventilated discs, thus eliminating the risk of vibrations.

The Brembo Sport Brake System

Features:

- Racing inspired Cross Drilled or Slotted Rotors
- 100% compatible with stock O.E. calipers, wheels and other chassis components
- Replaces vehicle's O.E. rotors without modifications

- Improves wet weather performance
- Reduces operating temperatures and fade
- Provides a racing look on all four corners of the vehicle

Applications Supported -

IMC carries the entire line of Brembo Brake Rotors available for European, Asian & Domestic vehicles.

Manufacturer Information -

Brembo operates in 13 countries over 3 continents, with 24 plants and commercial facilities. Brembo is built with the cooperation of more than 5700 employees. Of these employees, 9% are engineers and product specialists working in the research and development area. Numerous Formula1 racing teams put their trust in Brembo Brake Rotors including: Ferrari, Toyota, BMW-Sauber, Toro Rosso, Red Bull and Honda.

Brembo is ISO 9001, 9002 and QS 9000 certified for quality and safety. This industry certification assures that the manufacturing facility making your product adheres to the strictest internal regulation and quality control policies possible.
